Smart Solution for Railways

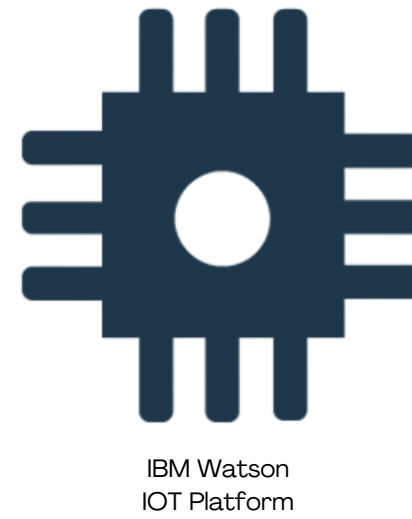

Node RED is a visual tool for building workflow for IOT scenario

## Stage 1

IOT Device

Python Coding

Stage 2

IBM Watson IOT Platform

Stage 3

Node RED

Web UI

Cloudant

Stage 4

Web link

USERS

QR code generate
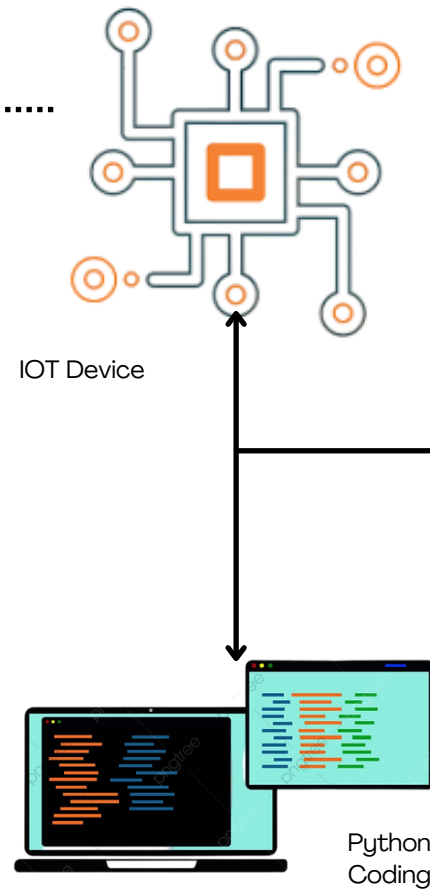

GPS used to locate the train
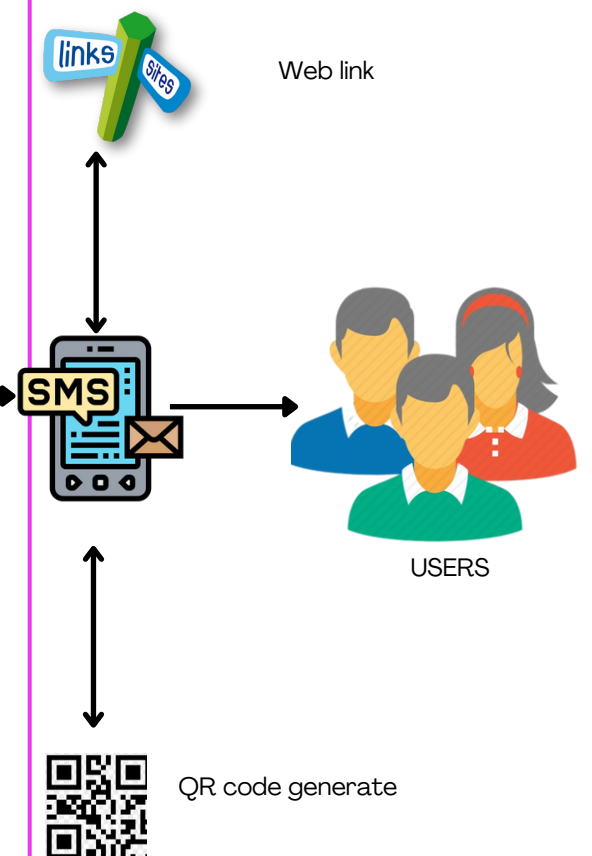

Cloud hosted service with caoabilities of manging and controlling the access of IOT devices

Provided integrated data management, search, analytics engine, designed for web application

User will get the notification by the sms and there will be generating of QR code with the required web link
